Vedanta Resources Plc is a British-Indian FTSE 250 mining company registered on the London Stock Exchange to give it a 'cloak of respect'. It is known as the 'world's most hated mining company' for environmental and human rights abuses for which they are opposed by local people wherever they operate. Vedanta is 69% owned by billionaire chairman Anil Agarwal and his family.

**In Zambia,** in April Supreme Court found Vedanta guilty of water pollution which poisoned up to 40,000 people in 2006. 2000 claimants are now due compensation for medical damage. Vedanta claim they are making a loss at their Konkola Copper Mines, and have fought increases in tax, while boss Anil Agarwal was caught on video bragging about a \$500m/year profit.

**In Odisha,** India Vedanta lost \$10 billion last year when an indigenous community won a ten year non-violent struggle against the State and the company to stop the Niyamgiri mountain being mined! Now Vedanta are pinning their hopes on the Modi government to reverse the decision and/or find them new bauxite mines.

**In Rajasthan,** India Vedanta bought state company Hindustan Zinc Limited for £64 million in 2002 (valued by BNP Paribas), against a true value of £2.5 billion. Their current attempt to buy the remaining 30% government shares (& remaining BALCO shares) is being opposed in the Supreme Court.
